

Application No. 09/342,949

icon E, and finisher icons F-J. However, as indicated above, feeder icons and finisher icons can be added or removed so that the printer icon 72 is an accurate depiction of the printing system actually being used by the operator. The printer status window 70 also includes a job progress meter 74, which continuously informs the operator of the total time required to complete a print job (e.g. 33 minutes), the time that has elapsed since the print job began (e.g. 28 minutes) and the time remaining (7 minutes). This enables the operator to make choices as to whether to stop or suspend the current job in order to process a higher priority job.

IN THE CLAIMS:

Please substitute amended claims 1-8 for pending claims 1-8 as follows:

1. (Amended) A graphical user interface for providing job tickets and print job information on a display screen for a printing system, comprising:
a depiction of a pathway access window including a print queue icon;
a depiction of a printer status window including a printer icon; and
a depiction of a job ticket window displaying a job ticket for each print job, wherein the job ticket window is displayed when the print queue icon is selected, and wherein each job ticket is associated with a job ticket icon indicating whether there are sufficient resources to complete the print job associated with the job ticket.

2. (Amended) The graphical user interface as in claim 26, wherein the print job information comprises required stock information.

3. (Amended) The graphical user interface as in claim 26, wherein the print job information comprises required finishing information.

Application No. 09/342,949

4. (Amended) The graphical user interface as in claim 26, wherein the print job information comprises required resources information.

5. (Amended) The graphical user interface as in claim 1, wherein the pathway access window further comprises a print engine icon, and wherein a print engine information window showing print engine information is displayed when the print engine icon is selected.

6. (Amended) The graphical user interface as in claim 5, wherein the print engine information includes toner levels in the printing system and wherein the print engine information window includes an insufficient resources icon when there is insufficient toner to complete one of the print jobs.

7. (Amended) The graphical user interface as in claim 1, wherein the printer icon includes a depiction of the print engine.

8. (Amended) The graphical user interface as in claim 7, wherein the print engine information includes toner levels in the printing system and wherein the print engine information window includes an insufficient resources icon when there is insufficient toner to complete one of the print jobs.

Please add the following new claim 25:

26. (New) The graphical user interface as in claim 1, further comprising a detailed job information window, which appears when one of the job ticket icons is selected, wherein the job information window includes job information associated with each job ticket not shown in the job ticket window.
